Nice
to
meet
you!

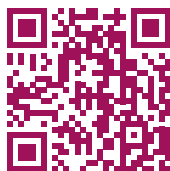

Professional Automation

We, at project Group based in Kranenburg/Germany, help our customers bring their ideas to life. As experts in sophisticated automation solutions, we assist with engineering and provide machines that cover the entire process chain, including secondary packaging, order picking and warehouse integration. A modular service package complements our range of services.

Our products can be found in a variety of industries, including beverages, food, and hygiene as well as in sectors like wood, steel, construction, glass and paper.

Our product portfolio includes packaging and palletizing machines, bundle wrappers, carry handle applicators, conveyor and transport systems as well as gantry systems like flat storage systems, which are ideal for low building heights or other specific customer requirements.

On the following pages, you will find an excerpt of our products.

All our products.

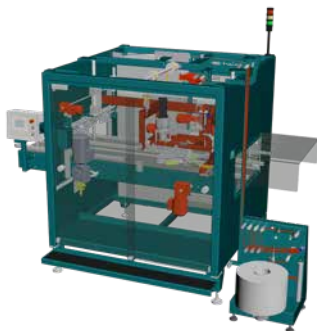

Palletizing

Our PROPAL is a robotic system that automatically stacks packages, e.g. cartons, barrels or bags, onto pallets and meets the highest requirements for speed, safety and automation.

Gantry Systems

Our highly flexible gantry system can be assembled according to the modular principle and can also be extended later and is even ideal for use with low ceiling heights.

Handle Applicator

The PROGRIP applies carry handles to a wide variety of products including bottles, cartons or wet wipes; the possibilities are extensive.

Labeling

The PROLABEL is a fully automatic and space-saving label applicator that applies labels to pallets, barrels or packages.

Mobile Handling Solution

Our mobile handling systems with innovative base vehicle, customer-specific module and 7-arm cobot offer maximum flexibility and customized solutions for optimum material and goods transport.

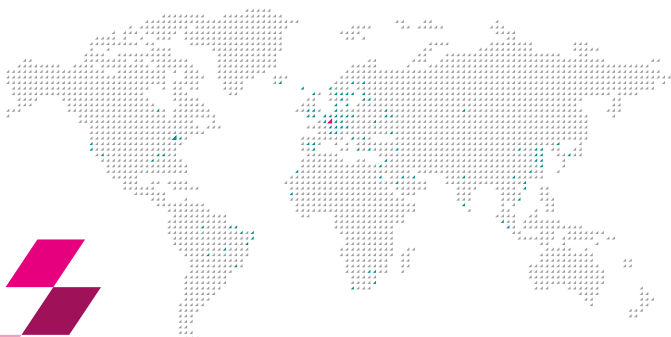

Banding

A versatile solution that can process paper and plastic in various widths and thicknesses. Also with recyclable materials.

Rooted in Kranenburg, innovating around the world.

We are Automation Experts!

We specialize in creating unique solutions!

The work of project Service & Produktion GmbH begins once the product is placed in its primary packaging. We specialize in the final packaging of goods, ensuring they can be transported to retailers, end consumers, or the next machine. Based on our modular machines designed for moving and gripping the goods, we provide tailored solutions that help increase efficiency in this stage of the production chain.
